

Genesis

My animal is a camel,

A camel is tan, Camels have humps, Camel live in the desert,

The desert is very hot, There is alot of sand,

Camel eat grass,

They get their food from the ground, The camel uses it's hoves for protection, The hoves protect it by helping the camel walk on the hot sand,

The camel uses it's long legs to move, It's long

legs move on the hot sand.

The camel camouflages by its tan color. It helps it blend in with the sand. This helps the camel blend in to hide from snakes.
